Phytochemicals

Phytochemical's are chemicals produced by plants through primary or secondary metabolism.They are the chemical compounds that occur naturally in plants.

Herbal Extracts

Extracts are one of the simplest way to enjoy the goodness of herbs. Extract is a substance made by extracting a part of raw material often by using solvents or water.

Liquid Extracts

A liquid extract is a concentrated solution made by extracting (pulling or washing) the herbs chemical constituents out of the herb fibre with a solution of alcohol or water.

Oil Soluble Extracts

These extracts are used for the preparation of different cosmetic products that augments the appearance or scent of human body.
